Oh yeah, it's working. Thankfully. Okay so so my name is Arthur I'm Brazilian and I'm 17 years old.

Okay, I'ma tell you I am from Colombia. I am 19. And yeah that's okay though as I said before there are those questions that we we can we can kind of use them as a guideline but we can of course, talk about other things, other topics that are related to. Okay. We can start by the first question. Do you want to reply first?

I don't know.

I don't really think like,

Even foreign like from your experiences abroad. What can you say about cultural differences? Do you think the countries? You've been are different. How

Okay, I think I can start. The only time I've been to Brazil was when I went to Mexico and 2016 and I I didn't feel that much of a cultural difference because I was traveling with my aunt and it was 14. So I was not able to go out by myself and talk to people. So I wasn't really emerged to the cold trip and I and also I didn't spend as much time as I was only there for 10 days, so,

I think one of the cultural difference that I, that I felt was that in Mexico. They had a much more laid-back attitude towards foreigners first temple. They, they didn't care because I because I feel like people really have that, like, Greenville cultures around the world, but I don't know why. But overall I feel like Mexico and Brazil share a lot of similarities and I think that's because it's so yeah.

We can talk about you. Now, I've been to Mexico City to the states. I've been to multiple states on the gestational kind of

Not late enough. Experience to answer the question, I didn't think it depends a lot on visitation people to receive like the way they would react to older people. Like you puts a when I went to Canada I never feel like I was out of the culture that it wasn't like it was in the state. I always feel like a no-brainer because she'll want to stay here until I speak English. Do you know that? You don't think it's native guy or that you don't belong there and you feel constantly like you're going to the reminder that you are not part of that siding. But for sure. Like

Represent the same people, I don't know because some people here will react to people speaking foreign languages in the street. Like it was Tara you like why were you saying what you're speaking? Like, I don't know where we are in Columbia supposed to speak in Norway in or whatever. So this like you snakes and you can see how you are because you're not like any indication like towards like this topic. I'm okay lately. So

I think that that have changed a lot how people used to react to foreigners because now when you see if in the swelling and Street people Will Ferrell then they will swing by there. People or something. Or less work people. So I will say that the most people can point immigrants or foreigners and you know because like

Before you didn't see any, I mean, a lot of things because before I would never see Universal Patrol or immigration police officers or immigration. You won't see anything at all as the people that's a password on your iPad that, like, your developers came in. There was no immigration system, or if you came from Germany, they were like, okay, you can stay as long as you want.

so,

what was the question again? Went to the states. I've been to say, smoothly on winter, so I feel

like there's a little closer difference between how people acting with your time than we do because it wasn't the first to confirm on France like to face the winter if the patient's life, even sorry, we don't have seen something. So, when I get there I just found one in the state and they would like you to bring enough clothes. And it was like, what will I need that? Because, and they would like he does his fucking freezing outside.

So it's very cool to see them to drink, iced coffee, even feel like fighting with outside outside. What was you? Be drinking iced coffee. If it's freaking freezing, react to things for Central. We are at. So used to convert, Apple to see that we are so used to have mountains around us, like the whole city is basically.

How do you say?

This is what I'm started. Forgetting English. How do you like a continuous?

Mongering thing. Like you can say it in Spanish.

Yeah, I think it's a mountain range. So we are so that was like literally the first I went to Miami for the first time I went out to Columbia was for going to Miami on when I got there I was like so sure of that or out of the one. I went to the same thing like I don't see a mountain around me until that little inmates, may be feeling like everything was closer. I don't know because I didn't see the limit like okay, so you can go when you're not going to order and they see that that's where the city and the state I didn't see any month. And so I will sing like, okay, there is no limit to go. I mean, you can go as far as you par drive to you or whatever you decide about it this way because I went to Mexico City and it was actually the other way around.

I would just remember on the last day, we weren't going back to school and on the bus to the airport. I just saw, I saw it snow for the first time, but it was, it was no go on the top of the mountain and I thought it was so beautiful. That was surrounded by mountains and I don't know. I never thought it this way, I just said that they finish without those kind of mountain, don't have any limits. I think it's, it's funny now that he said, it's another perspective or point of view, did you let Siri say that somebody's called, like okay this person, so cold, or is or some like that, but you mean that this person like is not like pretty

Are going or whatever. But I think they would have has a lot to do with that because for several people, in this state and Miami are leaving like a more warmer.

Play. Do you know my love mobile? I'm going to Boston for a sample or Canada, so people are more happy. I have your sorry. I'll Xavier are like more open and stuff like that winter. People was like, he didn't even know who you never watch out for the person that it was in front of you. And I say this because my family lives, there I am in part of my family lives in Boston.

And they they seem like I've been living in the same neighborhood at my own say that I believe in you just hang there for 20 years and the only time I get to know who lives in my surroundings is in summer time because it's the only time people go out. So I'd like to shape the way we are closer. It was cool to show for me not to know who lived in the house next to you, like Nazi people on the street or the only people that will talk to, you will be the people that we're working for you or pretend we're in a restaurant. The only people that will talk to you where they your waiters or you were in the Metro only domestic worker. Nobody will ever it that were to you or whatever or something that anything was like searching for me because we are used to be a lot more friendly and I don't know.

We have something similar in Brazil, not now that you said it because I feel like he is such a pretty much all the time and there are the beaches and people are more friendly in general and in some Paulo friends and it's just feel like I just feel like people are much more closed the weather but I don't know that much difference. Some Paulo is a bit colder. It gets cold for Brazilian standard for simple 9:10, but where was I?

What was supposed to stay with their depression? I think people have on their phones are listening to music.

Yeah. It's like I said I mean you can upload it becomes of being cold figuratively, or actually like on paper, like people actually get cold in color whether it's like, you know what I mean by. That is acceptable in the town. Treat you visited as a foreigner but not in the country you from

Okay, if it's real thin, my country to not answer to Strangers. Like if somebody says, can you some things you might pay attention to what he's saying, but in the state did you ask somebody something to somebody and that person doesn't feel like I'm doing. Did you go? They will do just caused by New Yorker. Story are so mean I'm so if you talk to people on people's like in the garage or you're busy or whatever do you say oh I'm sorry I can't or whatever. They was just When are the CMA Country? People will stop and show you help? I don't know.

I think, yeah.

Yeah, I've never felt this difference because in Brazil, something like that, I can't think of any habits that is coming in Brazil, and not coming to Mexico and I can't think of anything. What did you say? As I said before, that's one reason why?

Oh, okay. Because like I feel I felt when it wasn't the states that he was, he was weird to me to get sleep because I can't read you, never literally never see people. And it was like what you have to tip you. I'm really paying for the lease and I'm the only tip like mostly on restaurants when we want to. It's not something mandatory and I don't know if it's true, but I've heard that in the United States, you never know what the final price going to be because you have to talk later.

How can I say? I forgot the word but it's not a really, it's not really good. When you have a certain amount of money in your bank account and you have and you have to spend money but you just don't know what can you buy? Because you have to either be there because I wanted to buy a pookie.

Like how do you say that? Like I told you I can see the point is that he was so big that it was like oh my God I need to try this. When it was going to pay the girl was like okay it's true to life is around \$15 and I was like, okay who's your \$50? And she was like okay it's 1699 I would like That's actually something that because for instance, iPhone Spirit are so not only iPhones, but Apple product to buy to somebody else, you want to be lost much cheaper because I'm not really sure about the percentage, but I think at least half of the size of the natural products or or less, the more or less have is only texts entirely sure, but it's still on.

Same here. For example, I bought my phone. I mean, I have an iPhone 7 something and I remembered that I'd buy it and just stay because it was so much cheaper than to buy in Columbia at because before, I mean, there was like a \$200 difference between the price in the state and the price in Columbia. So I wasn't ready going to the states. Like I was like, okay, I'm going to stay anyway, so I'm going to buy you a phone. It doesn't make sense to buy things for me because you're going to be so, so, so expensive to cigarette, companies lake flato, or

Or mobistar. I don't know the name of the phone companies in Brazil, right? I think they're right about where you want to show people. Why is it not a free-market? Like there's a website where you can actually see? Where is it? Where is cheaper? Diesel official Apple Store. Sometimes it's cheaper to Temple. I was looking for a Macbook and

Journey by their recent Raziel and actually, it would be cheaper so weird. Like people like the chemistry sign is a peace deal with the gorillas in gorillas sound so much like us. And when they sign, is the tax, for the vortex was removed because this country was supposed not to be in war anymore but like the Gorillaz

King Bach resource rate with the dealer anymore so they're start again on stuff like that. So the war tax is on again like they're charging to work again and do you have to pay the war? That is not even affecting me? I mean I think it's so selfish to say that I don't want to pay for the war that I'm not want to be part of the country that didn't work, but just leave in or the conditions that live in it. I mean, I am never affect by War and I have never,

I have never seen a shooting, I have never seen. Somebody gets killed around the secure. Never because I leave in like dude, part of the country or if you did because we are part of like a higher than the meeting of the society. I guess. I mean I hate the directions to go to university because your parents are most wealthy and I was like, okay so I warned more but like I do have to pay for the war and I like

How do you say that word?

What do you call the amount of money does?

Did the surname division of the government has to spend something the budget and fiscal budget for the ministry of the patient and like that's why we have work because you are not the best indication, that's why people stupid. Yeah, actually, I'm sorry, I say Pollito party back in the 70s, I guess their main purpose. I mean, their sole purpose was to defeat the government on that moment because Ethan mom in Columbia, we have a president that I don't remember the name.

But he was kind of like Tater so they can realize it started as a way to defeat this president, or at least, that is what I have read and see my flight. Let you know, the national interests of people like Regular People. Like how do you say, like, in Pueblo? Like

Okay, first of the working class that makes like 80% of the population of the country. So everything is start fine. Randomly the band started doing.

I forgot to wear it like a talk.

Oh my God, I forget to work like, I guess for temple today.

Paula I was there a president I guess it's called. Sorry, is where did most of the people? Is the capital get sentenced to life. How do you say that before you go to jail? Do you get to go to the judge? And he gives you the fact that you mean the cord, they they they used to help people there like people that was not a yes or how come you don't know yet. I'm supposed to help people that are because they have like two jails in there like to decorate people on the ministry of I don't know what wasn't there. And so they kidnapped and after that is staring attacking and recycling

Station just to see how the attention that is, why you have to the point to the point that in 2016, the president sign an agreement with them not to fight anymore because they were super cool already.

But I didn't care, so they came back to the war, you know, I know you hate it, so the opposition military. So what about the fork is inside a category?

I don't know. I don't remember her name for e l. I n e for

I do remember the name of them but they're like for that other groups fall into because it's just like the people that go against the military that's basically I guess I'm to end our conversation. So yeah.

40.

No, I think it's it's 28 here in mind. I don't know. Oh yeah, I have every faith in it was good that we had this discussion and I'd like to thank you for taking part of it as project.

Okay, and I think that's it for now.

Yo, it's so it's so retarded.

Okay, so is your friends and I watch this later, I would like to apologize for my English, a free printable ride on stuff like that. So if something I did say you'd understand, you can ask me, like, hey, what are you saying, this and I will answer it. Like, let me just tell you something, you don't have to apologize because we were able to talk about discuss about complex situations and complex, the topic, and you really fine. Many people can't do this. When people are aliens real, Yes, I'll be proud of yourself and yeah.

7 year of them. That would be weird. Like like later I'm going to be like singing all these like oh my God, Somebody's Watching what it says like.
